Central, Hong Kong

- Successfully developed and deployed a fully functional e-wallet system with 5 currencies (USD, HKD, EUR, BTC and ETH) with SQLite-Flask Python back-end and HTML/CSS front-end. Used Stripe and several exchange rate APIs for crypto and forex. [Use Now!](#)
-

SKILLS AND TECHNOLOGIES

Programming Languages

- Python (Primary)
- C and C++ (Primary)
- SQL (Primary)
- R
- C#
- Dart / Flutter
- JavaScript

Languages

- English (Native)
- Arabic (Native)
- Chinese (Beginner)

Computer Platforms

- Linux OS (Kali)
- Pytorch and Tensorflow
- Anaconda and Spyder
- Microsoft Machine Learning Studio
- MS Access DB
- MongoDB
- SQLite
- Tableau
- Orange for Data Mining
- MS Office and Excel
- Tableau
- AWS services

Other Skills

- Bot Programming and Deployment
- API Development and Deployment with JSON
- Back-end and database development
- Microsoft Azure and Google Cloud development
- AI and ML development offline and on-cloud.
- Data exploration, cleaning, and parsing.
